Metsä Group begins statutory negotiations, 800 jobs at risk

By Andrea Venturini - Thursday 02 October

Metsä Group will start statutory negotiations involving all of its business areas and group operations which, if implemented, might lead to up to 800 layoffs, 540 of which would be in Finland, the company announced on Thursday October 2.

The measure is part of a €300 million (\$352 million) cost savings and profit improvement program launched by the company on July 31.

The company's president and chief executive officer, Jussi Vanhanen, said in a statement that Metsä Group's profitability has been undermined by three factors: "First, increased uncertainties in global trade have reduced demand for our products. Second, changes in exchange rates have weakened our result and will continue to do so. Third, the increase in raw material costs and the general cost level has eroded our profitability."

"We operate in a capital-intensive business in which lower utilization rates due to weak demand combined with clearly higher costs create an unsustainable equation that must be addressed," Vanhanen added.

The company said that particular attention was paid to procurement and logistics costs and the wood supply chain's efficiency, while the need to restructure and streamline operations to reduce fixed costs and significant efficiency enhancement measures in variable costs were also identified.

Metsä Group has approximately 9,600 permanent employees globally, of whom 5,600 are in Finland.

According to the company, the negotiations will not lead to permanent closures of production units, but mill-specific plans can include possible temporary closures or layoffs based on market situation.

During 2025, Metsä Board has undergone production adjustments and temporary layoffs at several of its paperboard and bleached chemi-thermomechanical pulp mills in Finland, based on change negotiations conducted earlier this year.

Metsä Group also highlighted that new business projects such as packaging product Muoto, textile fibre Kuura, lignin and bio-based CO₂ capture will continue according to each project's individual plan and schedule.

Metsä Board investments on hold: The group's Metsä Board will also be affected by the negotiations, which will involve more than 2,000 employees and might lead to up to 315 redundancies, of which 155 would be in Finland. These figures are included in the total for Metsä Group.

The company will also temporarily stop the renewal of the drying machine at its Husum pulp mill in Sweden and the barrier board development project at its Kyrö board mill in Finland. Furthermore, the investment project for the [change of product produced on BM2 board machine at Husum](#) in cooperation with Metsä Tissue will not be advanced for the time being.

Metsä Group's financial situation has been deteriorating in recent months. On July 7, it issued a profit warning for the second quarter due to weak Chinese and European demand for pulp, along with uncertainty over trade with the US.

The company's sales dropped by 9.7% year on year to €460.1 million in the second quarter, according to its latest financial results. It posted an operating

loss of €21.7 million in the second quarter, compared with an operating loss of a €0.7 million in the second quarter of 2024.

In August, both Moody's and S&P Global rating agencies changed the outlook of Metsä Board from stable to negative.

Stora Enso begins change negotiations at Imatra, Skoghall board mills and Gruvon sawmill

By Andrea Venturini - Thursday 02 October

Stora Enso will start change negotiations at its Imatra board and pulp mill in Finland on Tuesday October 7, Fastmarkets learned on Thursday October 2. If confirmed, negotiations could result in up to 61 layoffs and in the reorganization of tasks and entities.

Negotiations will commence on Tuesday and are expected to last for six weeks.

A spokesperson at the company told Fastmarkets that "the aim is to improve competitiveness and efficiency in a macroeconomic situation which remains uncertain, reflected in subdued and unstable market demand."

The Imatra mill employs 1,020 people and can produce 1.23 million tonnes per year of consumer packaging board and 1.3 million tpy of pulp.

The company also started change negotiations on Thursday at its Skoghall board and pulp mill and at its Gruvon sawmill, both in Sweden. About 60 jobs are at risk.

The Skoghall mill has 626 employees and can produce one million tpy of consumer packaging board and 700,000 tpy of pulp.

Stora Enso recently [started change negotiations also at its Varkaus Kraftliner mill](#) in Finland.

Italian recycled cartonboard producer FM Cartiere stops production – trades union

By Andrea Venturini - Friday 03 October

Italian cartonboard producer FM Cartiere, formerly known as Cartiera di Momo, has stopped production on Wednesday October 1, a spokesperson for the SLC-CGIL union told Fastmarkets on Friday October 3.

In September, [the firm announced a cassa integrazione straordinaria](#), a form of government-assisted income support during temporary layoffs, from October 1.

According to the union, the firm also announced an industrial plan to switch production from coated cartonboard to grey cartonboard.

"The industrial plan includes investments to revamp the paper machine [to produce] grey cartonboard, in synergy with the other paper mill run by the owners of FM Cartiere [Cartiere Fornaci]."

FM Cartiere was not available for immediate comment.

The company produces fully coated white lined chipboard and kraft chipboard. According to Fastmarkets' asset database, the company's Momo mill, located in Italy's Novara province, produces 80,000 tonnes per year of paper on one paper machine.

Cartiera Fornaci's Fagnano Olona mill produces 55,000 tpy of uncoated recycled cartonboard and coreboard.

September Packaging Focus: RCCM down but increases announced; pressure on cartonboard

By Jessica Zimbalatti - Thursday 02 October

RCCM prices drop, rises announced: Late August and September saw what some contacts called an unprecedented situation after simultaneous negotiations were rolled out for a September price cut and October price rise for recycled containerboard (RCCM).

At least four large RCCM producers are reported to be seeking the October rise, which amounts to requests as high as €120 (\$141) per tonne. At the same time, RCCM prices dropped by €20 per tonne in France and €20-30 per tonne in Germany in September. Spanish prices were steady until mid-month, when market contacts reported domestic levels were abruptly cut by €35 per tonne; exporters to Spain, they said, immediately followed. In Italy, over August and September cumulatively, RCCM prices came down by €20 per tonne. UK RCCM prices were stable over the month; contacts there were keeping an eye on mainland price cut and rise negotiations to get a sense of how October would go. Generally speaking, contacts across Europe reported high RCCM supply and disappointing demand through September and could not offer any clarity on how or if October prices would change.

UKL prices steady or down: On the unbleached kraftliner (UKL) side, in France and in Germany contacts reported that after a €40 per tonne rise in June, prices had cumulatively fallen by €30 per tonne by the time September prices were reported. But some contacts have reported since then that the June increase has been fully rolled back. UKL prices were stable in Italy and Spain, but contacts reported that there was still pressure on European UKL sales from cheap US offers, despite some large mills closing in the US earlier this year. Spanish buyers in particular were hopeful for a near-term price UKL price cut from European sellers. In the UK, the bottom end of UKL assessments saw a £25 (\$34) per tonne cut in September, after the top end saw the same decline in August.

FBB sees summer prices extended: Folding boxboard (FBB) prices were broadly stable in September after lower levels that had reportedly been offered over July and August were extended to the end of the quarter. At the same time, market sources said demand had been slow to pick up after the summer lull, leading to questions about the outlook for the fourth quarter. In the meantime, planned maintenance at several mills in September and October was expected to relieve some of the overcapacity in the short term. These include Metsä Board's 300,000 tpy Simpele FBB mill in Finland and MM's Kotka mill in the same country. Metsä Board's Husum mill, which has the capacity to produce 600,000 tpy of FBB, also has annual maintenance scheduled in the third quarter.

WLC prices under pressure: White-lined chipboard (WLC) prices remained under pressure in September after weak demand and lower paper for recycling (PFR) prices encouraged converters to continue to seek reductions. Some market sources reported broadly stable prices, while others who had not seen reductions over the summer reported they had been introduced from September. Looking ahead to the fourth quarter, sources said they expected some customers would be seeking further decreases in price levels. But with margins already very tight, it remained to be seen whether any further reductions in price levels would be possible from a producer's perspective.

Spain cartonboard commentary: FBB, WLC stable in September

By Sharon Levrez - Thursday 02 October

Prices for folding boxboard (FBB) and white-lined chipboard (WLC) in Spain remained stable in September while the market awaited a recovery in demand after the summer lull.

Rebates referred to as "summer prices" and "special project prices" in July and August for certain customers were reportedly extended into September.

Fastmarkets assessed the prices for **folding boxboard (GC2)**, 270-280 g, Spain and **white-lined chipboard (GD2)**, 300 g, Spain as unchanged.

In its latest update, Spanish association Aspapel reported that production of cartonboard and other packaging paper and board declined by 9.3% in the first seven months of 2025 compared with the same period last year to 455,900 tonnes. Total paper and board production was down by 2.5% at 3.8 million tonnes.

Labelexpo Europe 2025 records over 37,000 attendees

- Wednesday 01 October

Labelexpo Europe 2025, held for the first time in Barcelona in its 45-year history, concluded as the biggest show to date, both in exhibition space and attendance, including the highest international participation.

Show statistics revealed it was the largest Labelexpo event to date, with over 43,000 net sqm of exhibitor space. The event also broke attendance records with over 37,000 attendees. Key statistics include an increase of 18 percent in top decision makers, 49 percent increase on 2023 in South American visitors and 28 percent increase in North American visitors.

Spain dominated the list of top visiting countries alongside Italy, Germany, France and the United Kingdom.

Andy Thomas-Emans, Strategic Director at Labelexpo Global Series, said: "The move to Barcelona for Labelexpo Europe 2025 is a strategic milestone in the show's 45-year history. Breaking records in both exhibition space and attendance demonstrates the industry's continued growth and the global appeal of the new location. We are particularly encouraged by the significant increase in international participation, especially from the Americas, which validates our commitment to creating a truly global platform for the labels and package printing industry. We witnessed an industry embracing automation, sustainability, and the beginnings of AI integration. All signals of a vibrant sector that continues to evolve and innovate."

Technology & Launches

Labelexpo Europe 2025 was a hotbed for innovations in automation and sustainability.

For flexo, digital and hybrid press technologies, the key themes converged around automation, Cloud network integration and the first developments in AI-driven machine and user interfaces. Several of the digital launches are set to facilitate converters' entry to digital and enable suppliers to scale with them.

James Steptoe, Technical Director at Troika Systems Ltd, commented: "My overall impression of Labelexpo Europe was that it was incredibly dynamic and future focused. The scale of innovation on display – from automation and digital printing to sustainability solutions – highlighted how quickly the packaging industry is evolving. Seeing the latest technology and recognizing how companies are rethinking workflows, efficiency, and environmental responsibility was eye-opening. Moving forward, staying adaptable to change is going to be critical as we navigate newer technologies and methods."

Content, Features & Community

Labelexpo Europe 2025 launched new content and community features by introducing a user-friendly app, rest and work areas, the Gold Concierge Club, the Pulse conference arena, and a community industry run touring the streets of Barcelona.

The appointment of prominent industry experts, the Labelexpo Ambassadors, saw renowned industry experts delivering keynotes, Q&As and meet & greet sessions at the Pulse, covering folding cartons, flexible packaging, materials, sustainability, and AI & automation. In addition, the label industry's finest were celebrated at the inaugural Labels & Labeling Global Awards on the evening of the first day of the show at Festa Barcelona.

Labelexpo Europe 2025 expanded its sustainability credentials with the Better Stands program, which incentivizes exhibitors to utilize recyclable materials to build stands, and an exclusive partnership with DMP – recycling matrix waste, which is transformed into usable materials.

Andrew Galloway, Event Director, said: "Our vision for Labelexpo Europe 2025 extended beyond just exhibition space – we wanted to create a more immersive and valuable experience for our community. These initiatives reflect our dedication to the industry we serve, creating not just an exhibition but a comprehensive industry gathering that delivers value at every touchpoint."

LOUPE

This year, Labelexpo Global Series announced a major rebrand across the event portfolio, transitioning into the new brand, LOUPE, in 2026, starting with the Americas show in September.

The LOUPE portfolio remains labels-focused while acknowledging the industry's expansion and diversification in the past decade into flexible packaging and in-line folding cartons.

Jade Grace, Managing Director Labelexpo Global Series, concludes: "The decision to change the name of the show comes after two years of consideration and consultation with trusted partners, industry associations and key clients. Over the last decade, we have seen in-line and digital flexible packaging become an integral part of Labelexpo shows. Now we see the same trends happening in the folding cartons market with in-line, digital and hybrid set to disrupt this key package printing sector. Labels remain at the very core of the LOUPE portfolio, and we look forward to supporting the continued evolution of the industry."

The next Europe show will return from 5 - 8 October 2027 as LOUPE Europe 2027.

About Labelexpo Europe

The biennial Labelexpo Europe is part of the Labelexpo Global Series and its largest event. Since the inaugural event in 1980, it has become established as the leading global industry platform for label and package printing professionals, and renowned for its high number of live machinery demonstrations. The show brings together manufacturers and suppliers of the most advanced collection of technology with printers, brand owners and designers under one roof.

About LOUPE

LOUPE, formerly Labelexpo Global Series, is the leading global platform for the package printing and converting industry. With a 45-year heritage of connecting, inspiring, and equipping professionals with insights, tools, and relationships, LOUPE hosts world-class events across Europe, Americas, Asia, and beyond.

ECMA's 56th Congress in Istanbul brings together over 250 leaders to discuss about European cartonboard and folding carton industry

- Wednesday 01 October

More than 250 senior leaders from the European cartonboard & folding carton sectors and industry suppliers gathered in Istanbul, Turkey for the 56th European Carton Makers Association annual congress in late September.

Participants heard from a range of speakers from the European Commission, LVMH, Bain & Co, CEPI, Young People in Print, Moorgate Capital, the acclaimed economist Prof. Emre Alkin, an intergenerational expert and more. The congress also included a CEO roundtable (Bobst, Heidelberg, Metsa Board, Smurfit Westrock and Kasad)

In his opening speech, ECMA President Jean-Francois Roche commented that 2025 has been a challenging year with consumer-packaged goods whilst Ali Can Duran, President of the Turkish packaging manufacturers association – Kasad – spoke about how the future for fibre packaging is bright.

ECMA released the European Carton Prospects Report 2025 at the congress with the key findings presented by Neil Osment from NOA – these indicate a gradual recovery in volumes over the coming years supported by the continuing plastic to fibre transition, driven by consumer and brand owner preferences for sustainable fibre packaging options.

On the Thursday evening at the magnificent Peninsula Hotel in Istanbul, participants celebrated the winners of the European Carton of Excellence awards.

About ECMA

ECMA brings together folding carton converters, cartonboard mills, national associations and suppliers to the folding carton industry. ECMA represents over 650 carton producers with a current workforce of 60,000+ located across nearly all countries in the European Economic Area – this equates to over 80% of the €15 bill European folding carton market.

Coveris Group's Amberley Labels launches new luxury packaging offer at London Packaging Week 2025

- Wednesday 01 October

Amberley Labels, the Coveris Group's luxury labelling division, will unveil its brand-new extended luxury packaging offer at London Packaging Week 2025. A UK leader in premium label printing for some of the world's most recognisable brands, this launch elevates Amberley's market-leading luxury offer to the next level.

Renowned for its award-winning expertise, sustainability focus, and innovation, Amberley is responding to growing market demand by extending its capabilities to deliver complete end-to-end brand packaging solutions.

The new portfolio will include premium folding cartons, rigid and spiral-wound formats, bagasse-based solutions, and integrated smart technologies – creating a full brand toolkit that complements Amberley's luxury labelling offer perfectly. The expansion into this market strengthens Amberley's position as a single, trusted packaging partner across beauty, spirits and lifestyle categories.

Crafted with expert precision, cartons feature striking embellishments such as foiling, embossing, and soft touch finishes that pair seamlessly with Amberley's premium label range, helping brands to tell their stories with captivating packaging. With UK manufacturing supported by global sourcing, Amberley delivers speed, scalability and flexibility for both start-up brands and established global players.

Elevating its role as a full-service strategic partner, Amberley also provides concept-to-launch project leadership, alongside guidance on sustainability certifications, compliance, design innovation, and more.

Experience Amberley at London Packaging Week

Discover how Amberley continues to set new standards for premium packaging at London Packaging Week, the UK's home of packaging design and innovation. Learn more about the launch, advanced print technologies, and award-winning labels at the show.

Visit Amberley on stand F90 at London Packaging Week, 15th – 16th October 2025 at ExCeL London.

We are a specialist labels division for dedicated markets. Providing a unique set of services for beverage, household, personal care, OTC and automotive industries, we deliver award winning labels for leading brands, sustainably and efficiently. Our expertise and agility within the FMCG retail supply-chain enables us to disrupt and accelerate standard label models through our unique know how, vertically integrated processes and next generation technologies. Maximising brand impact whilst minimising waste, we keep packaging fully circular through our game-changing ReCover recycling operations, turning paper and plastic waste into high-quality materials for reuse.

About Coveris

Coveris is a leading European packaging company specialising in high-performance flexible and paper packaging solutions. Serving some of the world’s most recognised brands, Coveris protects a diverse range of products, including food, pet food, medical supplies, industrial, and agricultural goods. Committed to innovation and sustainability, Coveris continuously develops attractive and environmentally responsible packaging in line with its No Waste vision. Strengthening this commitment, Coveris established ReCover, a dedicated division focussed on waste procurement, processing, recycling technologies and supply chain partnerships to advance the circular economy for paper and plastic. With a corporate office in Vienna, Coveris operates 28 sites across the EMEA region, employing 4,000 people.

Van Genechten Packaging win Prix Formes de Luxe Award 2025 in folding carton packaging category

- Tuesday 30 September

Van Genechten Packaging (VGP) is proud to win the Prix Formes de Luxe Award 2025, in the folding carton packaging category. This award was given to the Martell Cognac Noblige LE25 gift box, which jury members active in the cosmetics industry praised for its meticulous craftsmanship.

Taking place on Monday, 29th September 2025 in Monaco, the Formes de Luxe Awards showcase the best in luxury packaging innovation.

We are delighted to be recognised among the best in luxury packaging as a winner of a Prix Formes de Luxe Award”, said Jérôme Cahu, Plant Manager VG Angoulême. “It is always a pleasure to collaborate with a premium customer like Martell. At VGP, we love to be challenged by innovative projects that allow us to think and act creatively.”

This award win is the latest in a series of wins for the Belgian carton converter. VGP won the Carton of the Year award at the recent European Carton Excellence Awards, one of 5 awards at the event in Istanbul.

MARTELL Cognac Noblige LE25

A premium, collectable pack that reflects Martell’s heritage and progressive values. Visually impactful and technically refined, this edition exemplifies how sustainable choices can elevate both brand and product.

What the Judges said

The decor of this monomaterial paper box presented a challenge. As the number of colours desired by marketing teams was industrially complex, the supplier reengineered the artwork to achieve the same visual impact, with cold-foil stamping used for a metallic effect," said Céline Fleuret of Puig.

About Van Genechten Packaging Group

Where people, brands and folding carton meet is where the magic happens at VGP, every single time. Van Genechten Packaging (VGP) is a leading independent European packaging specialist with over 190 years of history and approximately €500 million in annual revenue.

VGP operates across 14 converting sites, an extrusion site, a rigid box centre, and two fulfillment locations in 9 European countries. Renowned for its "people first" approach and customer-centric collaboration, VGP delivers a wide range of packaging solutions, including high-end printed folding cartons and offset laminated corrugated board, to the FMCG sector.

Specialists in the development, production, and logistics of high-quality short-term cardboard and corrugated cardboard displays for the Point-of-Sale (POS), VGP combines proven packaging expertise with specialized display solution capabilities to loyal customers and partners all over Europe.

Stora Enso collaborates with jewellery brand Majoral to introduce Papira box packaging

- Monday 29 September

Majoral, the jewellery brand rooted in Mediterranean culture and nature, is elevating its packaging with Papira, Stora Enso’s foam material innovation made from renewable sources. Known for handcrafted jewellery inspired by the landscapes and light of Formentera, Majoral has always placed design and storytelling at the heart of its creations.

For Majoral, packaging is part of the jewellery experience. The moment a customer opens a piece, the box should reflect the same values of beauty, care, and passion as the jewellery inside. Papira makes this possible by combining protection with either a smooth, elegant, or naturally vibrant surface structure that frames each piece while also offering a renewable and circular alternative.

“Packaging was one of the biggest challenges in the rebranding — how to simplify without losing the handcrafted soul of Majoral. With Papira, we found the answer. The foam itself becomes part of the story, a small landscape inside the box that embraces each piece of jewellery and makes it feel unique.” says Marina Goñi, Creative Director at Estudio Marina Goñi.

Papira is bio-based, recyclable, and biodegradable – designed to reduce reliance on fossil-based foams while maintaining the premium feel expected in luxury packaging. The solution was made possible together with ZFoam, the converter shaping Papira into custom packaging inserts for Majoral's jewellery collection, and Estudio Marina Goñi, the design studio behind the branding and creative concept.

“Papira is about more than function – it helps brands like Majoral create a complete experience, where packaging and product work seamlessly together while reducing environmental impact,” says Juha Kiviranta, VP, Emerging Business Biofoams at Stora Enso.

Majoral already uses recycled algae in some of its packaging, and with Papira their profile as a pioneer in sustainable design is further strengthened. This collaboration shows how premium brands can take the lead in the transition towards plastic-free, circular packaging solutions – without compromising on experience.
